Professional Summary

Software Engineer with hands-on experience building financial systems using .NET and MSSQL. Completed Meta's Frontend Developer certification and a Full-Stack Development certificate from the University of Moratuwa. Currently reading for a BIT degree at the University of Colombo. Passionate about building clean, scalable web applications.

Work Experience

Software Engineer Intern | Scienter Technologies

Aug 2025 – Feb 2026 (6 months)

- Developed a Pawning Management System to digitise gold loan operations, enabling staff to record, track and retrieve customer pawning records efficiently.
- Built backend services using ASP.NET Core and MSSQL to handle financial transactions, loan calculations, and customer data management.
- Collaborated with senior developers in an Agile environment, participating in sprint planning, code reviews, and daily standups.

Education

Bachelor of Information Technology (BIT) — Reading

2024 – Present University of Colombo

Certificate in Full-Stack Development

2024 University of Moratuwa, Sri Lanka

Meta Frontend Developer Professional Certificate

2024 Meta / Coursera

Projects

Pawning Management System | .NET · MSSQL · ASP.NET Core

A financial system built during internship to manage gold loan records, repayment schedules, and customer profiles. Includes role-based access control and transaction history.

Book Management System | Angular · ASP.NET Core · MSSQL

A full-stack web application for managing books, authors, and inventory. Features a dynamic Angular frontend with a RESTful ASP.NET Core and Web API.

ATM System | C# · Console Application

A console-based ATM simulation built in C# demonstrating core OOP principles — account management, balance enquiry, withdrawal, deposit, and PIN validation.

Personal Portfolio Website | HTML · CSS · JavaScript

Designed and developed a personal portfolio showcasing projects, skills, and contact information. Features a responsive layout and smooth navigation.

Employee Management System | HTML · CSS · PHP · MySQL

Developed a web-based Employee Management System using HTML, CSS, PHP, and MySQL. Implemented features such as user authentication, employee record management, attendance tracking, and database integration with a responsive user interface. Improved backend development and database management skills through hands-on full-stack development.

Technical Skills

Languages: C#, Java, Python, PHP, JavaScript, TypeScript, SQL, HTML, CSS, C Programming

Frontend: Angular, React, Tailwind CSS, Bootstrap

Backend: ASP.NET Core, RESTful APIs

Database: Microsoft SQL Server (MSSQL), Entity Framework

Tools: Git, GitHub, Visual Studio, VS Code, Postman

Other: Agile / Scrum, OOP, responsive design
